

# Tirana Flexible solar Panels

## Overview

---

How much solar energy does Tirana produce a day?

Average 5.74kWh/day in Spring. To maximize your solar PV system's energy output in Tirana, Albania (Lat/Long 41.3253, 19.8184) throughout the year, you should tilt your panels at an angle of 35° South for fixed panel installations.

How should solar panels be positioned in Tirana?

In Autumn, tilt panels to 45° facing South for maximum generation. During Winter, adjust your solar panels to a 56° angle towards the South for optimal energy production. Lastly, in Spring, position your panels at a 33° angle facing South to capture the most solar energy in Tirana, Albania.

How to optimize solar generation in Tirana?

Assuming you can modify the tilt angle of your solar PV panels throughout the year, you can optimize your solar generation in Tirana, Albania as follows: In Summer, set the angle of your panels to 25° facing South. In Autumn, tilt panels to 45° facing South for maximum generation.

Can flexible solar panels be installed on a fiberglass roof?

Flexible solar panels can be installed directly onto fiberglass or aluminum roofs using adhesive backing or minimal fasteners. For those considering a complete home solar solution, our residential solar panels offer similar efficiency benefits for permanent installations.
