

# **UAE Dubai Southern Power Grid Energy Storage**

## Overview

---

Does the UAE have energy storage systems in the GCC region?

The UAE has installed most of the energy storage systems in the GCC region. In 2016, Abu Dhabi Water & Electricity Authority announced the deployment of around 108 MW of sodium-sulfur-based BESS with an individual capacity of around 4 MW and 8 MW at different locations to support their distribution network.

What is the potential for energy storage in Saudi Arabia?

The potential for energy storage in the Kingdom of Saudi Arabia (KSA) is significant, given the country's abundant resources and growing demand for energy. With a rapidly expanding population and economy, KSA is facing increasing energy demand.

What is Mohammed bin Rashid Al Maktoum solar power plant - thermal energy storage system?

The Mohammed Bin Rashid Al Maktoum Solar Thermal Power Plant - Thermal Energy Storage System is a 100,000kW concrete thermal storage energy storage project located in Seih Al-Dahal, Dubai, the UAE. The thermal energy storage battery storage project uses concrete thermal storage storage technology.

How can governments support energy storage development in the GCC region?

The governments in the GCC region could collaborate with energy storage developers to introduce favorable regulations and provide capital investments to support the development of a utility-scale energy storage market and eliminate the financing risk and uncertainty factor for the projects by providing long-term contracts through auctions.

## UAE Dubai Southern Power Grid Energy Storage
