

Uninterrupted power supply to solar container communication stations across the country

Overview

What are containerized solar power solutions for the cellular industry?

Our Containerized Solar Power Solutions for the Cellular Industry are engineered to run 100% on solar power. They are equipped with battery storage and a AC or DC generator as an additional backup system to guarantee service continuity. All systems can be grid-tied or completely off-grid.

What is a containerized Solar System?

Our solar systems are designed and built to be turn-key with full remote monitoring and control. Our Containerized Solar Power Solutions for the Cellular Industry are engineered to run 100% on solar power. They are equipped with battery storage and a AC or DC generator as an additional backup system to guarantee service continuity.

Can a remote base station power supply be uninterrupted?

By Zhang Hongguan & Zhang Yufeng Uninterrupted power supply for remote base stations has been a challenge since the founding of the wireless industry, but alternative sources have a chance of succeeding where traditional solutions have failed.

How does a solar power supply work?

Solar or power grid electricity powers the base station and charges the batteries, with solar having priority. Only when neither proves sufficient will the batteries be utilized. Huawei's PowerCube hybrid power supply solution has been widely recognized for its remote-station viability.
