

# **Uninterruptible power supply equipment for domestic use in Sydney Australia**

## Overview

---

What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supplies (UPS) are used to protect your critical electrical equipment from power fluctuations and outages. There are a large range of UPS to fit everyone's needs, from small to industrial UPS. It is important to protect your equipment from loss of power, especially if your machinery is required to run 24/7.

What is a powershield ups?

Quality Powershield Uninterruptible power supplies (UPS) designed to offer power backup and protection from damaging power fluctuations. Powershield are a local company who make their UPS units for Australian conditions. Ideal for use in computer, CCTV, home theatre and professional server systems.

What is a UPS system used for?

An uninterruptible power supply (UPS) is a device that offers battery backup in the event the main electrical supply fails or drops. Smaller UPS systems deliver power for a few minutes or so – just enough time to save any important files and shut down the computer properly.

What is a ups power supply & how does it work?

Our UPS power supply provides protection from power surges, load shedding and unpredictable weather conditions. Uninterruptible Power Supply (UPS) ensures its internal battery gets constantly charged from mains power and delivers a steady, consistent electricity flow to any equipment or appliance plugged into it.
