What is an uninterruptible emergency power supply?

An uninterruptible emergency power supply is an emergency power supply that can supply power without interruption (a power supply that ensures continuity of AC power) even if the commercial power supply is stopped.

Why do medical facilities need a power supply?

In medical facilities and hospitals, there are many devices and equipment used to treat patients and protect their lives. In order for these to operate stably, it is extremely important to secure a power supply. Stopping equipment due to unexpected power outages or other power problems puts patients at risk, so this must be avoided.
