Uninterruptible power supply for NAS

Overview

How to choose the right uninterruptible power supply for Synology NAS?

Sep 2025 Choosing the right Uninterruptible Power Supply (UPS) for Synology Network Attached Storage (NAS) is crucial to protect data from power interruptions and ensure system stability. For 1–2 bay NAS devices, from 500-850VA should be enough (with desktop PC and router connected). For 4-8 bay NAS devices go from 1000-1500VA.

What is the best uninterruptable power supply for a NAS?

The CyberPower CP1500PFCLCD is one of the best uninterruptable power supplies to buy for a home office with a NAS. You'll be able to take advantage of the 1500 VA battery pack to power the NAS for a good while before needing to shut it down.

What is a NAS ups & how does it work?

Protect Device and Prevent Data Loss. With 12000mAh battery capacity, no matter blackouts or storms, this UPS provides uninterrupted power support and extends the running time of NAS about 10 minutes during an unexpected power outages in home or office.

Can a ups connect to a NAS with a data connection?

By connecting the UPS to a NAS with a data connection, the UPS can tell the NAS how much battery is left and have it safely shut down. It's not just a NAS the UPS can provide power for. Anything with a compatible cable will be able to connect to and draw from the device.
