

# Using inverter for outdoor camping

## Overview

---

What is a power inverter used for in camping?

A power inverter converts DC current to AC and provides electricity for camping needs. In this article, we will be looking at several power inverters suitable for camping. These are typically the same power inverters available in any hardware or electronic department stores. Using a power inverter:.

Do I need an inverter when camping?

If you boondock often, or camp in locations without hookups, an inverter may be a necessity for you and your comfort while camping. Inverters are similar to generators in that they allow you to power the majority of your RV without accessing shore power.

Is an inverter worth it for an overnight camping trip?

An inverter may be useful for an overnight camping trip. You can power your necessary appliances and leave the inverter going the whole time, probably with little issue! However, if you don't own a battery charger (AKA a converter; I know, confusing), your inverter can only do so much for so long.

How do I use a power inverter?

The first step in using your power inverter is to connect it to a power source. Here's how to do it: Ensure everything is off: Start by making sure your power inverter is turned off, and the devices you intend to power are unplugged. Connect the inverter: Connect the power inverter to your power source.
