

# **Vietnam Energy Storage Company**

## Overview

---

Can battery energy storage be commercially viable in Vietnam?

The BESS project aims to demonstrate the commercial viability of battery energy storage in Vietnam and showcase the practical benefits of renewable energy, including its reliability and efficiency. It also seeks to help Vietnam meet its climate action targets.

Can energy storage help Vietnam meet climate goals?

Co-funded by a grant from U.S. Mission Vietnam, the pilot project will demonstrate how energy storage can help Vietnam integrate more renewable energy into its power system to meet ambitious climate goals.

What is energy storage & why is it important?

Energy storage is a “force multiplier” for carbon-free energy. It allows for the integration of more solar, wind and distributed energy resources, and increases the capacity factor of existing plants to avoid the need for new thermal generation.

What is Ami AC renewables doing in Vietnam?

Since 2017, the company has been developing and operating renewable energy projects in Vietnam, which include the 252 MW wind project in Quang Binh and the 80 MW solar plants in Khanh Hoa and Dak Lak. In October 2021, U.S. Mission Vietnam awarded AMI AC Renewables a grant of US\$2.9 million to spearhead and develop the project.

## Vietnam Energy Storage Company
