

Wholesale 10000 watt inverter in Atlanta

Overview

What is a power inverter used for?

The most common use for this inverter is emergency backup power for residences, businesses and large off grid applications. You'll always be prepared for the next power outage with access to 10,000 watts of continuous power and 30,000 watts of surge (for up to 20 seconds).

What is a 48 volt DC inverter?

Built with a 48 volt DC input, this inverter performs with very little power loss. Users receive a notable increase in efficiency in large systems when compared to using inverters that accept 12 or 24 volts. This can be an attractive feature for sustainability lovers looking to live as efficiently as possible.

What is a SW4 inverter?

This inverter provides the reliability needed in any business or residential emergency backup power applications. This inverter is split-phase and will output 120 or 220/230/240Vac, and it can output 50 or 60Hz via the SW4 dipswitch on the DC side of the product.
