

# Wholesale solar power system in Norway

## Overview

---

Can you collect solar energy in Norway?

For example, the collection of solar energy was once regarded as gratuitous – especially in parts of the country that had a surplus of energy. Most homes in Norway are now equipped with smart meters allowing you to harvest solar energy, store it, and even sell it back to energy companies.

Is solar power a viable option in Norway?

Norwegian hydropower is currently so cheap that power companies do not consider it attractive to build solar power plants in Norway. In recent years, however, companies have started selling or leasing solar systems to private customers and businesses in Norway. Despite the low energy prices, solar power is growing rapidly in Norway.

How does solar power work in Norway?

Solar power is only produced during the day, thus it must either be used immediately, stored or sold via the central electricity grid. In Norway, production of solar energy can offload the tapping of water reservoirs. Smart grids and digitization: Most Norwegian households will soon be equipped with smart meters.

How much solar power does Norway have?

As of the beginning of 2025, the total installed capacity for solar power in Norway was 767 MW. In 2023, over 90 percent of the solar power capacity was connected to the Norwegian power grid. Around 5 percent of solar installations in Norway had an installed capacity of more than 50 kW in 2023.
