

# Wholesale usb c power station in Monaco

## Overview

---

Can a Type C plug socket be installed in Monaco?

Typically, type C plug sockets are not allowed to be installed in Monaco: these outlets are not earthed and are therefore considered dangerous. Only type E power points are permitted because they are grounded and therefore significantly safer. The only (and rare) exception to this rule, is that an old type C outlet should be replaced by a new one.

Can I use a Type C or F plug in Monaco?

Wall outlets and plugs are no exception. Monaco has standardized on type E sockets and plugs. Type C and type F plugs can also be used thanks to their compatibility with type E sockets. However, it is not permitted to install type C nor type F wall outlets. But why is that?

.

What type of plug does Monaco use?

Obsolete type E plug, i.e. without top and bottom earthing clips nor plastic notches on the left and right. Most European countries don't have the same plug and socket standard as Monaco; they use the German type F system instead. This used to be a problem because type E plugs and sockets were initially incompatible with type F.

What do Monaco electrical outlets look like?

When you are going on a trip to Monaco, be sure to pack the appropriate travel plug adapter that fits the local sockets. But what do those electrical outlets look like?

In Monaco, types C and E are the official standards. Since type F plugs are identical to type E plugs, they can also be used with French type E sockets.
