

Wind-resistant Monaco photovoltaic energy storage container for ships

Overview

What is a solarfold photovoltaic container?

The Solarfold photovoltaic container can be used anywhere and is characterized by its flexible and lightweight substructure. The semi-automatic electric drive brings the mobile photovoltaic system over a length of almost 130 meters quickly and without effort into operation in a very short time.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

Can solar power save fuel on ships?

Recent advances in solar cell and photovoltaic (PV) module technologies have led to solar power becoming a cost effective fuel reduction option on pleasure boats, ferries and tourist vessels. However on large ships the amount of fuel saved through the use of solar power alone is relatively small.

Why should you choose a solar storage container?

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy. Lower energy/maintenance costs ensure operational savings.
