

Wind solar energy storage offshore wind power leader

Overview

Is China a global leader in offshore wind?

China has established itself as the global leader in offshore wind through rapid and large-scale development. In 2024, China added 4.4 GW of offshore wind capacity, accounting for nearly 55% of all global additions that year. China's offshore wind capacity grew from less than 5 GW in 2018 to 42.7 GW by March 2025.

Is China the world's largest offshore wind powerhouse?

As of March 2025, China has emerged as the world's offshore wind powerhouse — growing from under 5 GW in 2018 to 42.7 GW in 2025 (50% of global capacity). Offshore wind could play a role in decarbonizing China's coastal provinces, but fossil fuels stand in the way.

Does China have an offshore wind fleet?

Though only a small portion of China's overall renewable capacity, China's offshore wind fleet contributes over 50% of the overall offshore wind capacity in construction worldwide. However, China is not immune to the challenges of this new market, as development of offshore wind in China has slowed in recent years.

Which company has the best offshore wind power?

Siemens AG commands a leading position with innovative turbine technology, digital twins, and system integration. Its global service network and advanced analytics are key drivers of asset reliability and continuous improvement in offshore wind power. 19. Sinovel Wind Group Co., Ltd
